George S. May International Company

Opinion Of Services Rendered
Closing Letter

On behalf of myself and the management team at [REDACTED] Inc. we are pleased and satisfied with the services rendered by the Project Director and Staff Executives of the George S. May International Company.

I believe in the forthcoming years as we continue to grow, our investment in your project team will be well spent monies for streamlining and budgeting the future for [REDACTED]

Your staff's recommendations and accepted procedures will enhance our operations and allow us the opportunity to review current and up to date information as needed to safeguard our Company.

Originally when we first contacted your Company on 5-14-02 , I had uncontrolled profits and expenses which needed to be brought back into focus and reviewed on a more of a upto date schedule basis.

Since that time we have identified and added many new realistic cost controlled procedures such as Profit and expense budgets, 6-week cash flow system, flex budgets, progress reports, organizational and time management tools. It has been determined that with these new procedures and organizational tools implemented we should ultimately be able to save between 150 – 200,000 dollars in controllable revenues.

To date all new procedures and templates have been either installed in our system or implemented for our use in the immediate future.

Again I am personally satisfied with the services of the George S. May staff and Thank You for bringing anticipated controllable procedures into immediate effect.

Sincerely Yours,

[REDACTED]
