

Wood & Metal Patterns - Matchplates
Shell Mold Core Boxes

To whom it may concern,

Regarding the work done here by the George May company.

I would like to say first of all that this was a totally new experience for us and the self-examination process was very enlightening but not enjoyable. The consultants pointed out many weaknesses in our operating process. That was OK; I feel that was a good thing. I was very pleased with the work done by the consultants. They were pleasant to work with and did a commendable job at helping us in our business planning. I am pleased with the new tools that they have prepared for us and I feel their use will help us to save money in our operation. The Quick Books instruction was extremely helpful and should prove to be very valuable. I am pleased with the quoting program and I particularly liked the incentive program that was developed. I see the potential to save money and that the processes they created will help things run more smoothly. I am cautiously optimistic that we will get the promised return on our investment. I am satisfied with the work your consultants did.

All in all I am satisfied with work done by your consultants and think that we will be a better Business. I am optimistic that the things we have been shown will improve our bottom line and hopefully give me more time to enjoy my life and not just run my business.

Regards,

President
